## The JSFS 85th Anniversary

The texture of the emulsified product showed high scores in sensory evaluation. The crude protein and ash contents were higher in carp than lizardfish scales.

## The JSFS 85th Anniversary

The taste sensing system, SA-402B Intelligent Sensor Technology Inc. Secondly, relationship between prey utilization and growth variation in hatchery-reared PBT larvae were investigated by nitrogen stable isotope and otolith analyses since marked growth variations of PBT larvae were observed in mass culture tanks. The concentration of other five trace metals was determined by an inductively coupled plasma optical emission spectrometry after pre-concentration using a polyamino polycarboxylic acid chelating resin.

## The JSFS 85th Anniversary

In the present study, the effect of short change in salinity on survival and bio-defence responses: lysozyme activity and phenol oxidase activity, of giant abalone *Haliotis gigantea* were investigated. He has gained 16 years of experience in the field of Education, Research and Technical Advisor while working at Veterinary Teaching Hospital, Department of Clinical Medicine and Surgery, University of Agriculture Faisalabad as a M.

## Topical use of 5% acyclovir cream for the treatment of occult and verrucous equine sarcoids: a double

Before challenge, experimental prawns were fed with diets containing 0. It can be seen that the lowest concentration of TAN, ammonium, nitrate, and orthophosphate was found on P2 aquaponics system using 10 romaine lettuces namely 1. The visualized flow patterns were approximately consisted with those of numerical simulation.

## The equine frozen semen industry

In the present study, we measured extracts related to taste from fish muscle, nori, and squid to test the applicability of the system for seafood

assessments. On the other hand, in the presence of serine protease inhibitors Benzamidine, SBTI and PMSF , thermal gels were obtained when heated at 40, 60 and 90°C.

### **Support and Science on the Web**

. Especially, comparative studies the process of decision making Kesen-numa City revealed that participatory process in decision making of the villages was critical. Such differences in the structures would be responsible for adaptation of Mb molecules to the physiological conditions of each species.
