## (ebook) Mentality of Apes

Will be a good Reading copy. Hobhouse reported favorable results on learning by imitation in monkeys in his 1901 work, which were contradicted by Thorndike's data. Rather, the incoming impulses are usually worked over and elaborated in the central control room into a tentative, cognitive-like map of the environment.

## The Mentality of Apes book by Wolfgang Köhler

According to the information of my predecessor, E. Back then, Apes were not typical subjects for psychological research. Given the chimpanzee's difficulty solving box-stacking problems, Kohler concluded that their notion of the basic physics of objects was as rudimentary as that of the chimpanzees.

## MENTALITY OF APES By Wolfgang Kohler

Toward that end, he conducted experiments in which Sultan was placed in a fenced-in enclosure with no stick.

## Wolfgang Kohler's The Mentality of Apes and the animal psychology of his time.

A brief time elapsed where the chimpanzee did not seem to realize the change, and then: When his glance again happens to fall on the stick, he springs up, pulls it in, runs quickly with it to the bars opposite the burying-place, and scrapes the sand away at the exact spot, until the pear appears. Kohler notes extensive ape individuality regarding intelligence. Of those features, the first has to do with the chimpanzee's visual world.

## Introduction to Mentality of Apes

In 1917, a few months after Kohler sent his first research report to the Prussian Academy of Sciences, Yerkes published The Mental Life of Monkeys and Apes: A Study of Ideational Behavior 1916b. With that in mind, this article's aim will be to explore the historical significance of this work and contextualize it in a tradition that sought to determine simian intellectual ability, one that began with Charles Darwin 1809-1882, was continued forward by Leonard T.

In Tolman's work, the Gestalt influence was apparent from the outset in his maze tasks--blocking the direct path to the reward, he observed whether or not subjects would take an indirect path to reach it--as well as in his theoretical interpretations of spatial learning, which he considered the acquisition of knowledge about patterns of spatial relationships in a situation i. A theory of learning and transfer.

### **The Mentality of Apes**

However, he did find data to support learning by imitation in a rhesus monkey , use of general notions concepts , and low-level reasoning. It was also a marker in the struggle between and which continued for the following half century. While greater experimental rigor in Thorndike's studies may have detracted from Hobhouse's less rigorous observations, many comparative psychologists of that time were reticent to accept that imitation was not an important factor in adaptation processes.
