STS

In the years immediately after the fall of Rome, there was a period of readjustment, where medieval society was more concerned with keeping peace and empire building than nurturing centers of learning. This last source discusses the life of one such trader-merchant, Goderic, who in time became a saint.

Technology in the Medieval Age

Creation Date: 14 c Nationality: German Style: Gothic Medium: Stained glass Original Site: Europe. All these needs resulted in the development of industries. The field of agriculture witnessed some important changes such as introducing of new crops, trees and horticultural plants.

Technology in the Middle Ages

As ore became more difficult to mine from the ground, the mines became deeper.

STS

His Frankish Empire covered most of Western Europe, and he instigated a revival in art, culture, and learning, using the Catholic Church to transmit knowledge and education.

Bert S. Hall, Science and Technology in Medieval Society. Pamela O. Long

Roger Bacon is a name that belongs alongside Aristotle, Avicenna, Galileo, and Newton as one of the great minds behind the formation of the scientific method. The Dark Ages - Was Science Dead in Medieval Society? Finally, many of the scholastic philosophers sought to remove divine intervention from the process of explaining natural phenomena, believing that scholars should look for a simpler, natural cause, rather than stating that it must be the work of divine providence. It is this interplay of technology and society throughout the Medieval Age that is so interesting.

Technology in the Medieval Age

This period was not a complete desert and, whilst we understand that raiding Saxons, Vikings, and other people halted progress, to a certain extent, there were still faint glimmerings that great minds were exploring the universe and trying to find answers.
