numbers, the Belgian trees, which are resistant to this pest, are straight whereas trees of the Riga variety are likely to be crooked.

Warren root collar weevil

They have been responsible for planting failures throughout the Lake States region. Risk of pine root collar weevil damage is greater if no or more species of pine are grown together. They emerge in the fall after pupating in the soil near the trees.

Procera Root Rot of White Pine

Thus, our findings add to the evidence that the weevils search for trees or groups of trees visually based on their silhouettes , , confirming and extending on the results of Windbreak trees and trees growing along the edges of plantations are most likely to be infested.
