DPI Game Fish Tagging Program

Australian Longline take an innovative approach to sustainability with continuous improvement a major focus. The bodies of deep water fishes are muscular with well developed organs. The peak spawning period in the southern hemisphere occurs in summer.

Pelagic protected areas: the missing dimension in ocean conservation

Demersal otter trawling for fish also called stern trawling, bottom trawling, otter trawling or trawling operates in south-eastern Australia, the south of Western Australia and the North West Shelf. All interactions are reported as per reporting requirements under the EPBC Act.

About

In Queensland, the Northern Territory and north-west Western Australia, Barramundi and Threadfin are the main target species.

About

Please contact DPI if you believe your local fishery has specific research requirements.

About

For example, the recreational tonnage of southern sand flathead *Platycephalus bassensis* in Tasmania in 2012—13 was 6 times that of the commercial fishery. Total fishery value Confidential due to the small number of fishers.

Fishing gear modifications to reduce elasmobranch mortality in pelagic and bottom longline fisheries off Northeast Brazil

They are similar to a Danish-seine, with the net being positively or negatively buoyant, depending on the target species. Mitigation measures that prove effective in the Eastern Tuna and Billfish Fishery are likely to be effective in the large, unregulated open ocean fisheries. Growth patterns are also monitored.

Birdswing ~ Port Fairy Pelagic
