It was not the first such incident at the medical center; four other such occurrences had been documented at the hospital between 1997 and 2000.

20 of the Greatest Blunders in Science in the Last 20 Years

MTBE, or methyl tertiary butyl ether, is a gasoline additive that came into use in the late 1970s during the phaseout of alkyl lead additives. Consider the case of killer bees. The potentially cancerous kidney remained intact and functioning.

10 Unbelievable Medical Mistakes

The fossil apparently was the flight of fancy of a Chinese farmer who had rigged together bird bits and a meat-eater's tail. Now he anticipates the asteroid will pass Earth at a safe distance of 600,000 miles.

How do surgical errors happen in modern hospitals?

Other than those making money off of the system, almost everyone else takes on additional risks. It was later revealed that a chain of errors before the surgery culminated in the wrong leg being prepped for the procedure.
