Mastectomy (Discharge Care)

During this time, you'll be weaned from a ventilator, have chest tubes that were inserted after surgery removed, and resume eating and drinking.

Symptom distress, anxiety, depression, and discharge information needs after peripheral arterial bypass

People who had complex surgeries or lack support at home may benefit from starting their recovery in an inpatient rehabilitation unit. Keep your incision or wound dry. In an attempt to heal the wound, the body is creating and maintaining an optimal moist wound environment.

Mastectomy (Discharge Care)

Make sure that you understand exactly what your doctor wants you to do. You may also take short baths if you wish. Surgical tape often falls off in 7 to 10 days.

Recovery After a Lobectomy for Lung Cancer

Change the bandage every day. The surgeon or nurse practitioner will provide guidelines about your activity and diet at this time. Try taking a sponge bath instead.
