He describes the principal people involved, and their motivations. That's the worst crime I've ever heard of.

**Scourge of the Swastika : A Short History of Nazi War Crimes by Lord Russell of Liverpool**

Edward Frederick Langley Russel's book is a catalogue of war crimes and crimes against humanity that Nazi Germany was guilty of. This is so sad and I am unable to understand how the Nazis were able to do this and most people stood by and watched it happen. He has singled out some of the near-animalistic men and women found all over Germany and Poland who were assigned to carry out these odious orders, without remorse.

**The Scourge of the Swastika**

It's hard to read and absorb at times, but this is information that should be taught along with the holocaust. Along with The Knights of Bushido: A Short History of Japanese War Crimes, by the same author, it was a phenomenal bestseller when first published.

**The scourge of the Swastika : a short history of Nazi war crimes : Russell of Liverpool, Edward Frederick Langley Russell, Baron, 1895**

It depicts how routinised murder was within the SS etc. This understanding was the basis for a lot of popular historical fiction, and this book is an interesting and useful read for that reason, even as it is not the most historically accurate document on the subject given all that is known and documented since. As the sub-title promises, it catalogues Nazi war crimes.

Of course the Soviet Union was an evil, totalitarian regime that slaughtered tens of millions, but I cannot imagine the average Soviet being as evil as the average Nazi. It depicts how routinised murder was within the SS etc. Babies, children, teens never being able to grow up and have lives.
