Rheumatoid arthritis

DMARDs have different modes of action and characteristics, such as method and frequency of administration and probability of adverse events or monitoring requirements.

Systemic rheumatic diseases: From biological agents to small molecules

The first recognized description of RA in modern medicine was in 1800 by the

French physician 1772—1840 who was based in the famed in Paris. They may be worried about you but might not feel comfortable asking about your pain. Monitoring requirements are listed below.

Treatments for rheumatoid arthritis: Traditional DMARDS vs. biologics

Ideally, NSAIDs and corticosteroids are used only for short-term management. Disease-modifying treatment has the best results when it is started early and aggressively.
