## GeoMoS Help 5

The table below describes the fields in the GNSS Properties dialog box. In this case it is designated course angle C and should be properly labeled to indicate the origin prefix and direction of measurement suffix. Surveyors are trained to get the most out of their instrumentation, but no observer can make perfect measurements.

## Plane and Geodetic Surveying

Step Action 1 Go to the Main Menu.

## GeoMoS Help 5

Step 1 Action Select from the menu Configuration, Customize. On a gnomonic chart the great circle course is the straight line joining the two points, and it would appear at first sight that such charts would be of great use to navigators.

## Bibliography and Indices

. In Canada f, generally more than double that quantity. Everything is, however, here drawn at once upon the paper, instead of being entered in a field-book.

## GeoMoS Help 5

Hard clamping can affect the pointing and is unnecessary. Plane and geodetic surveying: the management of control networks 60 7.
