Gillen D'Arcy Wood, "1816, The Year without a Summer"

Summer snowfall or otherwise was reported in various locations in and , located at around 30°N. Though fruits and vegetable crops survived, corn was reported to have ripened so poorly that no more than a quarter of it was usable for food. Temperatures dropped to as low as 40 degrees in July and August as far south as Connecticut.

200 years ago, we endured a 'year without a summer'

Then we made our descent. This prediction, and the strange behavior of nature at this time, stood in direct contrast with many of the feelings of the age.
