Rail transportation in the United States

These could be highly decorated and formed part of the spectacle of the fair.

Steam bus

The last new UK-built traction engines were constructed during the 1930s, although many continued in commercial use for many years while there remained experienced enginemmen available to drive them.

Traction engine

At the same time, the act gave local authorities the power to specify the hours during which any such vehicle might use the roads.

Advanced steam technology

This increased the speed of travel to 20 km an hour from a mere 7-8 km per hour.

Rail transportation in the United States

Particularly inadequate steering behavior and inadequate brakes were criticized in several designs.

Rail transportation in the United States

Buses and coach services often operate to a predetermined published defining the route and the timing, but smaller vehicles may be used on more flexible services. History of the Automobile: origin to 1900. Instead of looking like a steam car it resembled a small locomotive.

History of steam road vehicles

The main competition came from canals, many of which were in operation under state ownership, and from privately owned steamboats plying the nation's vast river system. An extension to the city boundary at Sheldon Arden Oak Road Service 94 was opened on 5th July, 1936, replacing journeys which had been operated by BMMO motor buses under an agreement with the Corporation dated 1st April, 1931, following the inclusion of Sheldon within the City.
