The legal proposals shaping the future of wildlife in China

These communications could be of up to 1000 words excluding Abstract and references and should have the following headings: Abstract unstructured, Key-words, Introduction, Case report, Discussion, Reference, Tables and Legends in that order. We are undertaking two studies related to emerging risks in this area — 1 identifying national differences and commonalities in risk perceptions on the topic of antimicrobial resistance and animal production to inform evidence-based EU risk communications strategy 2 providing insights into the human health impact of antimicrobial resistance in animals across the EU members states, through EU-wide survey of farmers, veterinarians and consumers.

Biosecurity risk mapping and gap analysis in South East Asia

International Livestock Research Institute ILRI. For example, equity has been included in the coverage decision process in Thailand, i. Authors do not have to pay for submission, processing or publication of articles.

The legal proposals shaping the future of wildlife in China

Some zoos have programs to breed species that are threatened with extinction and then to reintroduce individuals of the species to their native habitat.

Understanding Animal Health in Southeast Asia: Advances in the Collection, Management and Use of Animal Health Information

The link to wildlife trade in China, whether legal or illegal, shows the urgent need for stronger laws and enforcement to close markets for wild animal products. Rao KD, Petrosyan V, Araujo EC, McIntyre D. Avoid non-technical uses of technical terms in statistics, such as 'random' which implies a randomizing device, 'normal', 'significant', 'correlations', and 'sample'.

SUPPLY AND USE OF NHP AROUND THE WORLD

Tall eucalyptus trees, shrubs and flowers, pools, and a running stream make a beautiful retreat for flamingos, herons, egrets, and other birds. For instance, the problem in the stage of, that is, to evaluate the current situation also needs the intersectoral collaboration. We encourage research groups and funders to require plans for One Health integration of AMR and include representatives of all of these sectors in monitoring and evaluation efforts.
