### 16 Animals That Live in Australia

The largest species is the red kangaroo which stands over 6 feet tall. The southern cassowary inhabits the rainforests of north-eastern Australia.

### Australian Desert Animals

Most are the dromedaries, but a number of feral Bactrian camels are also present.

### Australian Animals

They come in a range of colours including blue, red and yellow.

### Australian Animals A

The short-beaked echidna is the only echidna found in Australia.

### 16 Animals That Live in Australia

The species has a dark green mottled upper body and a creamy-white underside. Due to the damage this introduced species was causing to indigenous wildlife, measures were taken between 2009 and 2013 to reduce the population to its current size.
