Chronology Of 'Mad Cow' Crisis

Although progress is being made, the Commission is concerned at its slow pace. A landmine survivor in Iraq recounts that he used to be refused jobs because of his disability. The French see it as an example of what PESCO is about.

Financing Natura 2000

Romanian authorities initially ordered the demolition of the plant, but the order was subsequently rescinded by a local court. These Member States did not communicate measures relating to the Directive on the classification, labelling and packaging of substances and mixtures.

EUR

On the recommendation of Environment Commissioner Janez Potočnik, the Commission has therefore decided to take Cyprus, Italy, Portugal and Spain to Court. In 2004, Secretary-General welcomed the plans and emphasised the value and importance of the Battlegroups in helping the UN deal with troublespots.

Infringement Cases

The court found numerous shortcomings, most of which have still not been tackled. The second issue concerns a failure to transpose legislation on packaging and packaging waste. Of those in service, 4 are.

Common Security and Defence Policy

The landfills in question are known to contain some hazardous waste, and are a threat to local water and air. Poland has two months to inform the Commission of measures taken to comply with the request for information, which takes the form of a 'reasoned opinion' under EU infringement procedures. The first concerns impact assessments, as the Commission is concerned that the potential environmental effects of the 2007-2010 road-building programme in Slovakia were not assessed as required by EU law.

Books

In the absence of a satisfactory response within two months, the Commission may refer the case to the EU Court of Justice. On the recommendation of Environment Commissioner Janez Potočnik, a reasoned opinion will be sent to France on both the designation and insufficient action grounds and a reasoned opinion on the action programme will be sent to Greece.
