Critical Reflections on the Body and Related Sociocultural Discourses at the Midlife Transition: An Interpretive Study of Women's Experiences

Other sources of information such as the internet, friends, neighbours and support groups are used as means to collect information to be discussed with the physician.

‘Engage me in taking care of my heart’: a grounded theory study on patient

The studies reviewed did not use the terms occupations or occupational engagement, but the theme of avenues to and through spirituality best reflects this potential construct. Health effects of caregiving: The caregiver health effects study. The pace, intimacy, and depth of the work are managed in the altered context.

8.R: Middle Adulthood (References)

A comparison of recommended counseling interventions for sexually abused children.

How Classic Grounded Theorists Teach the Method

University of Florida, Gainesville, Florida. Problem-focused strategies, such as relearning physical skills, exercising, taking risks to achieve an activity, and making modifications to activities, have been shown to aid restoration of a physical and social sense of self and could be considered to already be the essence of physical therapist practice. Department of Health and Human Services and U.

Chapter 25: Physical Development in Middle Adulthood

International Journal of Geriatric Psychiatry, 24 10 , 1079-1086.

Following the Path; A Grounded Theory Study Regarding Doctoral Roles

Journal of Intergenerational Relationships, 8 4 , 338-353, DOI: 10. University of Florida, Gainesville, Florida.

Outdoor Therapy: An Interpretative Phenomenological Analysis Examining the Lived

An understanding of positive and negative experiences could inform practice, and offer insights for appropriate training and supervision, and generate constructive dialogue amongst outdoor therapists. Stress and loss in middle-age. Temporal aspects of dying as a non-scheduled status passage.
