Scientists solve a 100

Do they have access to health care and can get screened? This raises important questions: can we trigger senescence in cancer cells? Users of this substance report that it has a garlic-like taste.

9 investigates: Cancer mystery in Huntersville

The state health department examined cancer rates in the 32937 — Satellite Beach, Indian Harbour Beach and South Patrick Shores — and 32940 — Suntree, Palm Shores and Viera. Kiera knew she wanted to work at HCI, so she contacted , a cancer investigator at HCI—and himself a childhood cancer survivor—whose lab studies that lead to cancers like sarcoma.

Cancer Grand Challenges

Almost all cases of Li-Fraumeni are hereditary, meaning the mutation passes down from generation to generation.

Cancer rates are higher in Brevard. Health officials don't know why

There are 21 st—century solutions you can draw on. Trevor Schaefer, an Idaho native who inspired the law after surviving childhood brain cancer, is frustrated with how slow progress has been. They're the ones asking the questions, and they're the ones stepping up when others are still in denial.

Cancer rates are higher in Brevard. Health officials don't know why

Have you ever met someone at the supermarket and have them tell you that their wife, husband, parent, aunt, uncle or child has whispered c-a-n-c-e-r? On the edge of Lake Norman, the largest man-made lake in North Carolina, two power plants jut out near Mooresville: the McGuire Nuclear Station and the coal-fired Marshall Steam Station, both owned by one of the largest energy companies in the country, Duke Energy. Miles Atkins, Mooresville's mayor, said some residents don't want to talk about the possibility of a cancer cluster because they are not personally affected or are anxious about what it could do to their property values. So, the mothers founded a non-profit advocacy group, , and kept pushing for action.

A cancer mystery more than 40 years old is solved thanks to epigenetics

Prominent cancer researchers in the publication noted in 2017 that thyroid cancer, once relatively rare, is now the eighth most commonly diagnosed cancer among women worldwide — as access to testing becomes more common and available. Those who responded to the CDC expressed an urgency to investigate potential cancer clusters that have not yet been confirmed.

Cancer mystery: 20 cases pop up among Satellite High grads

But tests found the chemicals in irrigation water and surface water samples near the base. They set mood—on paper, in songs, in a conference room.

9 investigates: Cancer mystery in Huntersville

Twelve years had passed between the publication of *A Quiet Storm* and *Land of Shadows*. After finishing treatment, Kiera wanted to focus her studies on helping others with cancer. But the experience did impart something invaluable: She learned how to be an advocate.
