Help save WWV & WWVH please listen & do survey

May soon be using GPS data.

NIST Radio Stations WWVH

Initially, the signal consisted of a constant frequency interrupted by patterns of pulses to indicate the time. The radio signals are broadcast on very precise frequencies by the and the NIST, formerly the National Bureau of Standards NBS. One second is defined as the period of the transition between two energy levels of the ground state of the Cesium-133 atom, making cesium oscillators the primary standard for time and frequency measurements.

Time May Be Running Out for Millions of Clocks

It was also reasonably close to Boulder about 50 miles or 80 kilometres, which made it easy to staff and manage, but much farther away from the mountains, which made it a better choice for broadcasting an omnidirectional signal. Several cesium atomic clocks provide the precise timing information broadcast by WWVH, these signals are amplified by transmitters below and broadcast from several antennas.

At The Tone: A Little History of NIST Radio Stations WWV & WWVH

S5-0287 Please keep the services going. Thanks for the great service. He uses the phones network time, of course The point of it all is that looking our national time standard to the average consumer especially for the comparatively small budget they run under, is totally STUPID!!! In the summer of 1914, a survey party at Quinze Dam in the watershed attempted to receive time signals transmitted from; however, signals were not resolvable and the time signal from in was used instead.

Concern Rising within Amateur Radio Community over WWV

S5-0352 I appreciate this service.

WWVB

S5-0145 Thank You for your services and open door visitor policy.

WWV Simulator

Shortwave is also valuable during power outages.

Standard frequency and time signal service

Each change in the DST bits will first be received in the mainland United States between 16:00 PST and 20:00 EDT, depending on the local time zone and on whether DST is about to begin or end. My use of WWV-H-B includes work as broadcast engineer and search and rescue volunteer. Hope the bean counters don't kill it.
