## Using Answer Set Programming for Commonsense Reasoning in the Winograd Schema Challenge

It depends on the nature of the problem to be solved.

## Commonsense Reasoning

As well, they address issues of ambiguities in route descriptions, in which there are several alternatives to the agents processing them. This approach, described in, uses preference semantics as a way to organize nonmonotonic solutions to the problems of reasoning about action and change. The Winograd Schema Challenge In AAAI Spring Symposium on Logical Formalizations of Commonsense Reasoning, Stanford, CA, USA.

## 20th WCP: Modus Ponens, Modus Tollens, and Likeness

Here, we give a brief discussion about pros and cons of these approaches. Deadline for paper registration: January 27th, 2017.

## Nonmonotonic Reasoning

The Enabling Mathematical Cultures workshop will have space on Days 2 and 3 of the meeting for a number of accepted talks addressing the themes of social machines of mathematics, mathematical collaboration, mathematical practices, ethnographic or sociological studies of mathematics, computer-assisted proving, and argumentation theory as applied in the mathematical realm. As a result, knowledge acquired by crowdsourcing can be somewhat messy, which again often needs human expert validation.

## 12 Common Biases That Affect How We Make Everyday Decisions

As HaPoC conferences aim to provide a platform for interdisciplinary discussions among researchers, contributions stimulating such discussions are preferable.
