

Nursing, midwifery and health visiting education - a statement of strategic intent

Department of Health - NHS England » Nursing, midwifery and care staff

There are also post-registration qualifications recorded by the UKCC a list of which (26 pages long) is attached as Appendix 2.¹⁷ This enormously long list has been out of date since November 1998 only a limited number of post-registration qualifications are recorded,¹⁸ as follows:

- Specialist Practitioner Qualifications¹⁷
 - Occupational Health Nurse
 - Community Mental Health Nurse
 - Community Learning Disability Nurse
 - Community Children's Nurse
 - Community Nurse in the Home/District Nurse
 - General Practice Nurse
 - School Nurse
 - Public Health Nursing/Health Visiting
- Teachers of Nursing/Midwifery/Health Visiting

These qualifications are all at least at degree level.¹⁸

An additional qualification that may be 'marked' on the Register at some time in the future, possibly 2001, is one that meets the standards for functioning at a 'higher level of practice'. The standard for a 'higher level of practice' has been identified by the recent (1998) Department of Health (England) strategy for Nursing, Midwifery and Health Visiting as 'potentially' part of the requirements for those seeking posts as consultant nurses.¹⁹

¹⁷ See below at page Error! Bookmark not defined.

¹⁸ Nurses, Midwives and Health Visitors Rules Approval Order 1993 as amended, SI 1993/273, section 11. Rule 11 says certain qualifications "shall" be recorded. Nurses though are not obliged to submit for recording.

¹⁹ NB this is not the same as Specialist Nursing and is a higher level of practice than that achieved with a registrable qualification.

²⁰ The learning outcomes are set out in the Register's Letter of 27th May 1998.

²¹ If adopted this could lead to the suffix 'RN' being added to their Registration.

Description: -

-Nursing, midwifery and health visiting education - a statement of strategic intent

-Nursing, midwifery and health visiting education - a statement of strategic intent

Nursing UCAS Personal Statement Examples

CNSs responded to the needs of patients with chronic and complex conditions. This paper discusses some of the issues involved in the design of the processes for developing effective partnerships between faculties of nursing and nursing provider organizations. I am a confident student willing to provide the university with good communication skills, supporting others, and being able to interact closely with them.

School of Nursing

Let us know if this is OK.

School of Nursing

The umbrella of advance practice includes the CNS, NP, certified nurse anesthetist CRNA and certified nurse-midwife CNM.

Student clinical placement

The main thing admission officers are looking for is passion, they can teach you everything else! The Saudi healthcare system is challenged by inadequate primary care provision, with insufficient general practitioners. The intent was not to discuss titles or roles but to focus on the enablers and obstacles to APN that may be experienced in any geography, while positioning the discussion within the context of KFSHRC and Saudi Arabia. In the USA, NPs and CNSs are strictly regulated, have protected titles, credentialing and privileging.
