### Pablo Picasso

He was reported to have moved residences ninety-three times due to a hatred of cleaning, preferring to find new lodgings when his home became unbearable. Alice continued living with Monet, and she became his second wife in 1892 after Ernest Hoschede passed away. This set up was appropriate as their relationship was undergoing immense strain.

### Donatello Biography, Life & Quotes

He was then commissioned to execute the large-scale figure of Saint John the Evangelist, which he worked on between 1409 and 1411, a work which significantly marked the transition in art from the late Gothic to the Early Renaissance.

### Leonardo da Vinci

In the following years, he would rely on these skills to support himself by producing scientific drawings and copies of museum paintings, as well as giving private drawing lessons in his studio. While working here, Hokusai published his first series of prints, of kabuki actors, in 1779, and married his first wife, about whom little is known.

### Caravaggio

A serious and prematurely world-weary child, the young Picasso possessed a pair of piercing, watchful black eyes that seemed to mark him destined for greatness. Niki creates the first of her snake chairs, vases, and lamps that same year. Even though his works are now canonized, for a number of years after Monet's death, he was only known in select circles of art lovers.
