NDA Resource Allocation Research

Anticipate what-if scenarios to determine worst-case resource management scenarios. There were also anecdotal examples of early EV charge infrastructure becoming obsolete and being removed or vandalised. Leadership National Leadership During the Local Partnerships workshops we polled participants on the extent to which they felt there was a clear national strategy for the roll out of EV charging infrastructure and whether there was clarity from Government about the role expected from local authorities.

NDA Resource Allocation Research

Leadership Barriers A significant minority of participants in the workshop sessions expressed concerns over whether now was the right time to act. As the grid is not equal in all locations there is a need for sensible use of subsidies to avoid areas being left behind. This conclusion is consistent with the overall ORCS support reaching under one third of councils.

How important is the coast? A survey of coastal objectives in an Australian regional city

There needs to be more thought addressed to the decarbonisation of rural transport, particularly as public charges in these locations may not be commercially attractive. There is no significantly predominant commercial model for delivery.

Local authority resource allocation with multiple objectives : an education example / K. Geary

Technology A concern that was raised repeatedly throughout our research was that local authorities would risk making a long-term investment in technology that quickly became obsolete. Save as to any specific contractual agreement that states otherwise, Local Partnerships shall not incur any liability for any action or omission arising out of any reliance being placed on the report including any information it contains by any organisation or other person.

NDA Resource Allocation Research

Where appropriate we have included outputs from this survey in our report commentary.

Applications of Population Counts Based on Administrative Data at Local Level, Applied Spatial Analysis and Policy

Overall support for involvement appears to be greater in authorities who have responsibility for housing than with those who only have transport authorities. Resource management is an essential project management process and a core activity of human resource management — from large enterprise to small startups.
