Principles of Macroeconomics

A disequilibrium sets in motion a chain of adjustment and readjustment processes; for example, on the stock market, buyers and sellers change their behaviour daily in response to changing circumstances. Concept of Equilibrium: Equilibrium is a concept borrowed from mechanics where we get the idea of equilibrium system of forces. However, eventually the depreciation rate will limit the expansion of capital: savings will be used up replacing depreciated capital, and no savings will remain to pay for an additional expansion in capital.

ECON 151: Macroeconomics

Thus national income is measured as a flow per year.

Principles of Macroeconomics

Any change in disposable income will move you along the Functions.

Economics for Beginners: Understanding the Basics

These choices will be signaled globally to our partners and will not affect browsing data. Microeconomics Macroeconomics, which focuses on smaller factors that affect choices made by individuals and companies. Money certainly is one of those resources, but other things can play a role in economics as well.
