The Job of a DNA Analyst

Training can last anywhere from six months to three years. FIU is home to the innovative International Forensic Research Institute IFRI giving students the opportunity to collaborate with a variety of forensic laboratories on the local, state, and national levels.

> Mission > Mission Support > Forensics

These specialists also partner with the Red Cross to identify victims of war crimes and genocidal attacks around the world. With a slightly different purview than a certificate in forensic science, this program focuses on crime scene investigation and processes. Vanessa Schlottmann Calderon, a former crime scene investigator for the Pasadena Police Department and current instructor in the forensic sciences program at NU, explains that a crime scene investigator processes the crime scene by recording video, taking photos, collecting evidence, and sketching notes.

IACIS

Though the job is typically nine-to-five in nature, some work long hours and even on weekends to process evidence quickly. Then, they bring these samples back to the crime lab and isolate the DNA from each sample.

IACIS

In beginning your search, it may be better to focus on professional and academic organizations. Forensic Serologist Requirements, Education, and Training The majority of forensic serologists have a Bachelor of Science degree. The graduate certificate specifically ties into crime scene analysis, investigation or forensics.

Graduate Certificate in Forensic DNA & Serology

Professionals who interpret forensic DNA are known as DNA analysts or forensic scientists.

Forensic Science Training

Students will have access to the most current, consistent knowledge base to get them up to speed quickly.
