Of the principal components explaining more than 95% of the chemical variation, the first, which opposes phosphate to carbonate and to sodium, differentiates between types of macrograins; the second, based on calcium and sodium not coupled with carbonate, differentiates between phosphorite fields. However, i do recommend to visit Cyprus because of its very interesting history and the very beautiful beaches, and especially their culture! Lemurs of the Lost World: exploring the forests and Crocodile Caves of Madagascar. I wanted an option to stay in a cheaper hotel the first two nights.
