**Ecology and Society: Environmental and Social Impacts of Oil Palm Plantations and their Implications for Biofuel Production in Indonesia**

A major factor in the success of the contract forestry program is the assumption that independent managers will strive to protect their investment from fire. Salience, credibility, legitimacy and boundaries: linking research, assessment and decision making. Paper presented at the annual meeting of the American Sociological Association, Atlanta Hilton Hotel, Atlanta, GA, 16 August 2003.

**Deforestation**

Mesolithic used fire to create openings for and. The issue is difficult to resolve and numerous mediation attempts by local government institutions have proven unsuccessful. Environmental, economic, and social impacts of oil palm in Indonesia:

Filesize: 54.83 MB

a synthesis of opportunities and challenges.

## **Farming**

To harness the energies of upland populations in creating sustainable land use systems and to ensure the success of reforestation and forest remnant conservation efforts, the national government must establish a new political relationship with the upland population. Our study is the first to our knowledge that investigates gross soil-N cycling processes with land-use change in Southeast Asian lowland tropics, while also taking into account soil textural effects. .

## **Erosion in Sumani Watershed, West Sumatra**

The project is managed by Center for International Forestry Research and implemented in collaboration with the Council on Scientific and Industrial Research South Africa , Joanneum Research Austria , the Universidad Autónoma de México, and the Stockholm Environment Institute.

## **Erosion in Sumani Watershed, West Sumatra**

Standard soil parameter: particle size distribution of the top soil four main texture classes and organic carbon content % Schmidt et al.

## **Erosion in Sumani Watershed, West Sumatra**

LABOR-BASED TIMBER EXTRACTION Some foresters argue that sustained-yield timber extraction is highly feasible when native-style logging exclusively is used by local communities Dugan, 1989. In Great Britain, shade-tolerant species such as and are replaced in the by , brambles, grasses and nettles. The company tried to remedy the problem by building canals both inside and along the perimeter of the plantation.

## **Erosion in Sumani Watershed, West Sumatra**

An Exploration of the Issues and the Evidence to Date from Latin America. The rising number of outbreaks is probably linked to and. Is soil degradation unrelated to deforestation? This has occurred in , , and.
