Follicular Carcinoma

London: Blackwell Scientific Publications, 1992. Disclaimer: The articles on MyPathologyReport are intended for general informational purposes only and they do not address individual circumstances. Particular aspects of the arguments against the traditional classification of these lesions include the developmental biology of adnexal neoplasms; neoplasms consistently showing 2 or more lines of differentiation; striking associations of particular entities; the anatomic distributions of various adnexal neoplasms; and finally the lack of specificity of many histologic, histochemical, immunohistopathologic, and ultrastructural findings.
