

# Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona

American Water Resources Association - USEPA 2004 Guidelines for Water Reuse

Description: -

- Remote sensing -- Congresses.

Evapotranspiration -- Congresses. Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona

- AWRA monograph series -- no. 6. Remote sensing applications for consumptive use (evapotranspiration) - papers presented at 21st Annual AWRA Conference and Symposium, August 11-16, 1985, Tucson, Arizona

Notes: Includes bibliographical references.

This edition was published in 1986

## Our Common Journey: A Transition Toward Sustainability

. In any case, it is essential to quantify the sustainable yield of such systems, for appropriate resource development.

### dissmeyer part 1 pgs 1

Humanity is no more master of its fate in interactions with the environment than is a canoeist shooting the rapids of a turbulent river—a vivid image used to suggest the challenges to policy in seeking sustainable development. Reliability and Limitation of Findings The issue of abandoned well closure is well defined in Federal, State, and local regulations.

**K.S. Saini and S.K. Chongtham. 2012. Effect of residue management practices and nitrogen levels on soil properties, yield and uptake of nitrogen, phosphorus and potassium in soybean sown after preceding wheat crop. Indian Journal of Ecology. Vol. 39 no.1: 158**

Model structure The selection of which model to use should be based on the issues being investigated and the data available.

## USEPA 2004 Guidelines for Water Reuse

. While expert knowledge can provide indications of such impacts, detailed analysis requires the use of mathematical models to separate the water balance dynamically at the temporal scale at which the important processes are operating. The model is therefore more of a statistical regression-type model with weighting parameters having some perceived physical meaning.
