Destination Guide: Ringley (England, Bolton) in United Kingdom

David Cronshaw had to identify the bodies of his three sons, Jackson, James and Thomas, all three had died in the blast. The site of this new shaft the Gal Pit or Engine Pit was 260 feet above the Doe seam and close to a group of cottages demolished in 1965 that was originally the home of John Heathcote. After hours of searching only 21 bodies had been recovered from the Moorfield pit and eighteen from Whinney Hill.

About

As a result, the mine was seized in the early 1930s by Powell Duffryn steam coal company.

Great Places to Walk Your Dog in Manchester

So which story you believe is up to you.

★ Windsor Colliery

The Trail includes 28 art pieces and follows a well established 30-mile footpath stretching from Salford Quays through Bury into Rossendale and up to the Pennines above Bacup. A depth of no more than 50 feet was required to cut into the Doe seam at this point, the seam being worked down a slope.

★ Windsor Colliery

A free bibliography on the Colliery site is available from Salford Local History Libraries or from the Museum of Mining Information Leaflet No.

Pastscape

Windsor Colliery was a coal mine in the village of Abertridwr, Caerphilly. The grooves in the centre of the brickwork which had wooden planks slotted across them are clearly visible. This could go one of two ways, neither of which were pleasant and both of which ended with death and injury.

Story

James Brindley designed a system using water from the River Irwell to power a waterwheel close to the shaft.

Report

The exploration group had used it to store pipes in, further on it split. Chatterley Whitfield Colliery is a disused coal mine on the outskirts of Chell, Staffordshire in Stoke on Trent. Beyond these, towards the hillside, is a square pond which supplied the water for the boilers via a water purifying plant.
