Poison ivy

Only people get this rash.

ENH886/EP220: Identification of Poison Ivy, Poison Oak, Poison Sumac, and Poisonwood

For a beefed up version and in wet locations, use. Wash hands and clothing well afterwards. Symptoms Itching, burning, redness and small blisters appear on the skin within a few hours to 5 days after contact.

Poison Ivy, Poison Oak and Poison Sumac

Many other plants can be toxic to humans if ingested.

USDA Farmers' Bulletin 1972: Poison

Virginia creeper has toothed edge leaflets. She was advised to seek medical evaluation because her rash was severe and the products she was using didn't help. The leaflets are long ovals and have smooth margins.
