Host Country Effects of Foreign Direct Investment

Lastly, while the short run contribution of official development assistance on economic growth of Cambodia and Lao PDR still remains in the long run, the effect becomes insignificant for Myanmar. The interaction term between FDI and gross domestic saving also has negative sign as portions of GDP, but the estimated coefficient is not statistically significant.

The Impact of Foreign Capital Inflow on Economic Growth in Developing Countries

The Pakistan Development Review 41:4 Part II Winter 2002 pp. Further, the fact that many developing countries have capital controls on the capital account which is to restrict wholesale repatriation of both profits and investment and relax the current count where only profits and that too a percentage of it is repatriated.

Fiscal stance, foreign capital inflows and the behavior of current account in the Asian countries

The primary sector became less important as a destination for international investment and the decreasing importance of the developing economies as host countries for FDI continued. Scarce capital can be accessed by developing nations through FDI, and this is exceptionally essential to Economic Growth. FDI is not only a transfer of ownership from domestic to foreign residents but also a mechanism that makes it possible for foreign investors to exercise management and control over host country firms—that is, it is a corporate governance mechanism.

Foreign capital flows and economic growth in East Asian countries

During the period 1980 to 1990, the increase was 182 per cent while between 1990 and 2000 there was an even larger increase of 212 per cent. Table 9 Inward FDI stock as percentage of total FDI stock by industrial sector Country France Germany Italy Mexico Netherl. Economic Growth of Pakistan: Effects of Foreign Capital Inflows.

Fiscal stance, foreign capital inflows and the behavior of current account in the Asian countries

Introduction and Summary of the Thesis Chapter 1. Extremely low income-levels also eliminate market-seeking where the aim is to serve demand in the local market as a motive for FDI in these economies.

Differential Impacts of Foreign Capital and Remittance Inflows on Domestic Savings in the Developing Countries: A Dynamic Heterogeneous Panel Analysis

The First World War severed many of the interconnections in the global economy and destroyed large amounts of real capital including a substantial share of the European stock of FDI. Macroeconomic stability also makes reform of the financial sector more likely to succeed and thus supports the development of capital market that can foster private investment. *Journal of International Development*, 375-398.
