Home and Community

Older people may also seem to act like babies, but this kind of behavior is never intentional. Quality indicators for safe medication preparation and administration: a systematic review.

Alternatives to Assisted Living

Providing a wide variety of activities, such as gardening, taking walks, and dancing, will potentially give a resident physical and mental stimulation and will encourage independence. They want to visit the world outside their door. A healthy, independent senior has plenty of choices, naturally.

Caring for the elderly: Dealing with resistance

Other Data Sources Data on the functionally impaired elderly can often be found by accessing specialized inventories. Cultural sensitivity training should be offered on a regular basis.

An appraisal of the cost

Doctors have a hard time predicting how long an older, sick person will live. Currently, we are conducting a study comparing two green care farms providing 24-hour nursing home care for people with dementia with other small-scale, homelike care facilities and traditional nursing homes.

Caring for the elderly: Dealing with resistance
