genetic management of native species in Scotland

Mapping at this scale relates soil type to individual fields depicted on the base map. Together, these issues clearly constrain the extent to which all of the objectives articulated by these visions can be achieved.

Newspaper resources

The distribution of the areas selected corresponds with the Ordnance Survey 10x10km 1:25,000 series.

Historic Environment Resource Guide for Forest and Woodland Managers in Scotland

Woodland networks play a valuable role in facilitating species movement, developing climate change resilience, and providing greenways sustainable green travel routes for recreation.

Effects of yogic breath regulation: A narrative review of scientific evidence

The bibliography was last updated in 2016. This is the vision of a wilder Scotland, one that benefits all life, including human life.

Historic views to be restored at Chatelherault Country Park

A key consideration here may be the differing timelines over which stakeholders were considering changes.

Native Woodland Survey of Scotland (NWSS)

After 30 years, the RDC estimated for a report published in 1990 that the national population of red deer had doubled to 300,000, with an estimated 30,000 or 10% of those living in woodlands.

The management of wild deer in Scotland: Deer Working Group report

Furthermore, understanding and acknowledging different visions is an important step towards collaboration between stakeholders Valluri-Nitsch et al.
