individual hospitals and hospital systems

Filesize: 44.210 MB

report summary facility-level data on services capacity, revenues and expenses by payer, and utilization by payer.

APRA releases quarterly private health insurance statistics for September 2020

Estimates for the 12-month period ending with a specific quarter include all seasons of the year and, thus, are insensitive to seasonality. Did you wash the dead body? NOTES: Deaths from Influenza and pneumonia were identified using underlying cause-of-death codes J09—J18 in the International Classification of Diseases, Tenth Revision. NOTES: Deaths from Pneumonitis due to solids and liquids were identified using underlying cause-of-death code J69 in the International Classification of Diseases, Tenth Revision.

ONS health statistics quarterly update

NOTES: Deaths from heart disease were identified using underlying cause-of-death codes I00—I09, I11, I13, and I20—I51 in the International Classification of Diseases, Tenth Revision. NOTES: Deaths from Parkinson disease were identified using underlying cause-of-death codes G20—G21 in the International Classification of Diseases, Tenth Revision.

Community Health Statistics

Data for the current year are available by individual calendar quarters.

Hospital Quarterly Financial & Utilization Report

NOTES: Deaths from drug overdose were identified using underlying cause-of-death codes X40-X44, X60-X64, X85, and Y10-Y14 in the

International Classification of Diseases, Tenth Revision. For comparability with rates for 12-month periods, the quarterly 3-month period rates have been annualized to present deaths per year per 100,000 population that would be expected if the quarter specific rate prevailed for 12 months. Crude and age-adjusted data for prior quarters are available for download.

Products

For comparability with rates for 12-month periods, the quarterly 3-month period rates have been annualized to present deaths per year per 100,000 population that would be expected if the quarter-specific rate prevailed for 12 months. Was the dead body naked or dressed for a journey? For comparability with rates for 12-month periods, the quarterly 3-month period rates have been annualized to present deaths per year per 100,000 population that would be expected if the quarter specific rate prevailed for 12 months. For more information on the data source, methods, and definitions used for this table or chart, refer to the Suggested citation.

Data and Statistics

Provisional estimates are based on a snapshot of all the vital statistics data received and processed by NCHS as of a specified cutoff date. Estimates for the 12-month period ending with a specific quarter include all seasons of the year and, thus, are insensitive to seasonality.

World Health Statistics Quarterly

Was the dead body dead when found? Estimates for the 12-month period ending with a specific quarter include all seasons of the year and, thus, are insensitive to seasonality. Estimates for the 12-month period ending with a specific quarter include all seasons of the year and, thus, are insensitive to seasonality. NOTES: Deaths from Chronic lower respiratory diseases were identified using underlying cause-of-death codes J40—J47 in the International Classification of Diseases, Tenth Revision.
