Understanding the experiences of adolescents and young adults with cancer: A meta

Although these patients shared common challenges for having cancer at a young age, types of cancer, types and intensity of treatment, and accompanied disabilities generate different impacts that shape the cancer experience in distinct ways Grinyer, 2007 ; these require separate attention. Bevölkerungsprognosen Zuwanderung nach Deutschland Prozesse und Herausforderungen ; Kiedrich, 8.

Understanding the experiences of adolescents and young adults with cancer: A meta

Studies on Cultures and Societies, 28 , pp.

Health and the family life cycle : selected studies on the interaction between mortality, the family and its life cycle.

Findings: As illustrated in Table 1, a set of three emerging themes were developed using hermeneutic interpretation. In Slavic rites, there were analogies between wedding rituals and those observed at the funerals of young people, because the death of a young person without the enactment of the other events of the life cycle was considered particularly dangerous to the social community Fischer. The Hungarian family is a typical nuclear one; the couple planning the number of children and practicing birth control to achieve their goal--not more than 2 children on the average.

Mortality and the life cycle of the family in Hungary

We also had a tradition in Syria to store all types of food to have access to it all the time e. As child mortality becomes negligible and adult mortality in the younger age group is now rather low, 3 groups can be identified in the population where mortality has special relevance regarding the family life cycle: 1 infants, 2 middle aged males, and 3 people over 60 years. The denial of rites of passage in contemporary societies.

Progress in demographic methodology

Rites of passage and healing efficacy: An ethnographic study of an intimate partner violence intervention. The study found that the wife's education, the husband's education, the wife's occupation, the husband's occupation, and marital status were significantly related to fertility.

Assessment of self

Methods of Estimating Basic Demographic Measures from Incomplete Data. Self-sacrifice and abnegation in the kitchen.
