Macroecology: Concepts and Consequences: 43rd Symposium of the British Ecological Society by Tim M. Blackburn (University of Birmingham) at Abbey's Bookshop

Each section presents different viewpoints on the answer to a key question in macroecology: Why are most species rare and small-bodied, and restricted in their distribution? A phylogenetic view Andy Purvis, C.

Macroecology : concepts and consequences : the 43rd Annual Symposium of the British Ecological Society, held at the University of Birmingham, 17

It is therefore an extremely useful reading not only for those interested in macroecology itself, but for everybody who wants to know which big ecological ideas are now in the air.
