Renewable energy explained

However, hydroelectricity requires a large power plant, which is very expensive to build.

10 Different Alternative Sources of Energy (Solar, Wind, Geothermal, Biomass, Ocean and other energy sources)

For example, people can build houses so their windows face the path of the sun. Solar energy does not create any pollution and is widely used by many countries.

Alternative Energy Sources

Hydrogen can also be used to make bombs like the ones used by America on Hiroshima and Nagasaki which makes it highly inflammable. . A is taking place across America, underscored by the steady expansion of the U.

11 Alternative Energy Sources (With Examples)

Unlike wind turbines and hydroelectricity, photovoltaic conversion to electricity is direct, meaning an expensive, bulky generator is not required. Another problem is the hazard these moving blades cause for birds flying through the area. Explore resource types with this curated collection of classroom resources.
