WIDENING AND INCREASING POST

This draft is prepared by the Mathematics teacher in consultation with the head of the institution. Paul has been heavily involved with KS5 mathematics through recent reforms to A levels and the introduction of Core Maths, including policy and implementation.

Understanding the World Through Math

Math helps us understand the world — and we use the world to understand math. AS: Use of maths, statistics. If the base of the exponential function is not e but another number a the derivative is different.

But many world events and phenomena are unpredictable and can only be described using statistical models, so a globally focused math program needs to consider including statistics. Students should be made aware that some university courses require a Further Mathematics qualification. Then you do not have to use the limit definition anymore to find it, which makes computations a lot easier.

If it exists, then you have the derivative, or else you know the function is not differentiable.
