

Predicting disease outcomes using an artificial neural network.

Oxford Brookes University - Heart Disease Classification Using Artificial Neural Networks

Description: -

-Predicting disease outcomes using an artificial neural network.

-Predicting disease outcomes using an artificial neural network.

Notes: Thesis (M.Sc.) - Oxford Brookes University, Oxford, 2003.

The Use of Artificial Neural Network to Predict Surgical Outcomes After Inguinal Hernia Repair

Artificial neural networks in medical diagnosis. Ensemble based adaptive over-sampling method for imbalanced data learning in computer aided detection of microaneurysm. The positive predictive values PPV for the aggregated models were higher than the individual models when predicting mechanical ventilation and ICU, reaching 0.

Artificial neural network based prediction of postthrombolysis intracerebral hemorrhage and death

Kang DY, Cho KJ, Kwon O, Kwon JM, Jeon KH, Park H, Lee Y, Park J, Oh BH.

Artificial neural networks improve early outcome prediction and risk classification in out

Thus, we demonstrate that ANN has the potential to assist clinicians in patient stratification, and to establish individualized treatment plans for optimized AIS management. Clinical course and outcomes of critically ill patients with SARS-CoV-2 pneumonia in Wuhan, China: A single-centered, retrospective, observational study.

Predicting major neurologic improvement and long

UCI Machine Learning Repository: Data Sets 2007.

Artificial intelligence can predict premature death, study finds

Martinell L, Nielsen N, Herlitz J, Karlsson T, Horn J, Wise MP, Uندن J, Rylander C. Patient data were entered in an online electronic case record form and externally monitored.
