

Man and beast - comparative social behavior

Smithsonian Institution - Irrational thinking in humans: An evolutionary proposal for Ellis' genetic postulate

The Zoological Perspective

• *Ethology is a natural science, a branch of biology, from which it took the comparative method for the study of behavioral morphology and the analytic method for the causal analysis of behavioral physiology. Its philosophical base is a critical realism. Its orientation is neo-Darwinistic and it enjoys a fruitful exchange of ideas with other schools of behavior.....Eibl-Eibesfeldt.*

Description: -

-

Social behavior in animals.

Social psychology.

Psychology, Comparative. Man and beast - comparative social behavior

-Man and beast - comparative social behavior

Notes: Includes bibliographies.
