RELIGION AND SCIENTIFIC NATURALISM: OVERCOMING THE CONFLICTS.

It would be interesting to overhear a conversation between Plantinga and some of the popular Naturalists who seem to be dismissive of Theism and very confident of their conclusions. But those properties will be adaptive, whether or not the content the having of which they constitute, is true.

Where the Conflict Really Lies: Science, Religion, and Naturalism

But despite the fact that this book is mainly philosophy Dawkins is not a philosopher, but a biologist , much of the philosophy he purveys is remarkably jejune. The God of this naturalistic theism is supreme in power, yet this deity works exclusively through persuasion i.

Review of and Scientific

Hawking concludes that life is possible only because the universe is expanding at just the rate required to avoid recollapse. Yet, the battle is not so much over philosophy, but science. Plantinga does not set out here to argue for the existence of a particular God.

Science or naturalism? The contradictions of Richard Dawkins

He makes a case that their arguments are not only inconclusive, but that the supposed conflicts themselves are superficial, due to the methodological naturalism used by science. SCIENCE AND RELIGION have had a long, rich history of conflict, most famously with the case of Galileo, who was found guilty of heresy for discovering one of the basic truths of our solar system. Sometimes I found this a bit monotonous but I guess years of being a philosopher at the highest level has trained him to always present a watertight case.

Science or naturalism? The contradictions of Richard Dawkins

Six of the book's ten chapters are devoted to the first sub-thesis, which, reworded one more time, says that no alleged conflicts between science and theistic religion are both genuine and substantial.

Americans' Perception of Conflict Between Science and Religion

The conclusion is that it is true that unguided evolution has indeed produced all of those wonders. It's hard, for example, to read Behe's descriptions of various biochemical machines and not feel any inclination at all to believe they are designed.
