He questions whether this model could be put in place in view of the legal challenges that would ensue. Here, we describe a procedure for immobilization of HaloTag fusion proteins and how immobilized proteins can be used to study protein-protein and protein-DNA interactions in vivo and in vitro.

Volume Information on JSTOR

For example, Locatelli-Hoops et al. Peroxisomal matrix and membrane proteins were targeted to distinct regions of the peroxisomal structures. The key findings, claims, or recommendations are then presented with author commentary in the following areas: digital libraries; phases in the application of information technology to libraries; print-based technology; tools for accessing digital libraries; digital library models; stakeholder motivations and concerns; digital library projects; libraries of the future; and harnessing the true potential of information technology.

Library Automation Systems and Networks

Examination of protein degradation provides clues into the dynamics of protein function and mechanisms of cell apoptosis. The ProCite database contains about 375 document surrogates to published literature on the library of the future; this report cites over half of this literature.
