Speech Language Pathology (MA)

Department of Education and the Council for Higher Education Accreditation oversee accrediting agencies. Speech Language Pathologists, also commonly called SLPs for short, are healthcare professionals who work with people from varying populations to improve communication techniques and treat swallowing disorders.

Duke Speech Pathology and Audiology Clinic

Some speech language pathologists, such as those working for schools, may need to travel between different schools or facilities. The clinical track requires 60 semester credits and prepares graduates for American Speech-Language-Hearing Association certification and North Carolina licensure.

Speech Language Pathology

Hedman, MA, CCC-SLP Rehabilitation Manager Speech-Language Pathology — Main Campus Brian completed his Bachelor of Arts at the University of Connecticut and his Master of Arts in Speech-Language Pathology at Kent State University. Graduates also qualify to apply for doctoral speech-language programs, find leadership positions, or become certified to work for public schools. In addition to providing comprehensive hearing, speech, and swallowing evaluations, our providers have expertise in and access to advanced testing to pinpoint what may be causing communication or swallowing problems.

Medical Speech

SLPs can work in many different settings but one of their main job responsibilities across all environments is to conduct a speech language assessments aimed at coming up with a treatment plan for any speech disorders within a particular patient. These include articulation therapy, language intervention activities, and others depending on the type of speech or. A medical speech-language pathologist works in health care and diagnoses and treats a wide range of speech, language, cognitive, and swallowing disorders.

Speech Pathologist Job Description: Salary, Skills, & More

Give yourself plenty of time to get to your appointment.

Speech

As the large baby-boom population grows older, there will be more instances of health conditions such as strokes or dementia, which can cause speech or language impairments. Speech-language pathologists work with people who are often frustrated by their difficulties. These therapists help patients cope with anxiety, stress, disabilities, and injuries through recreational activities.

Speech

Increased awareness of speech and language disorders, such as stuttering, in younger children should lead to a need for more speech-language pathologists who specialize in treating that age group.
