But the Sassanach tried to starve the nation at home while the land was full of crops that the British hyenas bought and sold in Rio de Janeiro. But their second finding is even more intriguing: Even as carbon isotopes increased, the nitrogen isotopes decreased. In 1844, Irish newspapers carried reports concerning a disease which for two years had attacked the potato crops in America.

After 168 Years, Potato Famine Mystery Solved

Social dislocation—the congregation of the hungry at soup kitchens, food depots, and overcrowded work houses—created conditions that were ideal for spreading infectious diseases such as , , and. . The potato was also used extensively as a fodder crop for livestock immediately prior to the famine.
