Behavioral Aspects of Neuroendocrinology / Edition 1 by Detlev Ganten

Part I provides an introduction to recent developments concerning neuroendocrine control, as well as a consideration of general implications of such developments for the stress field.

[Biological factors of post

Topics range from the interactions between the nervous and endocrine systems to the regulation of reproduction, development, metabolism, fluid balance, and biological rhythms.

Pubertal Development and Behavior: Hormonal Activation of Social and Motivational Tendencies

This perspective has increased our appreciation of the structural indices whereby stimuli including hormones alter neurons and neuronal networks. Sexual dimorphism in vocal control areas of songbird brain. A limited edition print version is also available.

Pubertal Development and Behavior: Hormonal Activation of Social and Motivational Tendencies

Testosterone-sensitive vasotocin-immunoreactive cells and fibers in the canary brain. Developmental patterns and gender differences in the experience of peer companionship during adolescence.
