} The lexicographical ordering may also be used to characterize all group orders on \mathbb{Z}_n . Death is an inevitable, universal process that eventually occurs in all living organisms. EEGs can detect spurious electrical impulses, while certain , , , or can suppress or even stop brain activity on a temporary basis.

Home

Consciousness Main article: Much interest and debate surround the question of what happens to one's consciousness as one's body dies. Because nothing really dies and the temporary material body is always changing, both in this life and the next, death simply means forgetfulness of one's previous experiences previous material identity.

Lexicographic order

Critics of this definition state that while cessation of these functions may be permanent, it does not mean the situation is irreversible, because if CPR was applied, the person could be revived.
