Education Systems Around The World: A Comparison

Yet behind these broad global trends there is substantial cross-country — and cross-regional — heterogeneity.

Expanding teaching and learning horizons in economic education (eBook, 2009) [ne-x.uni.rf.gdl]

To facilitate control of his empire, Alexander had commenced the process of founding a network of cities or communities organized and administered in the Greek manner.

Ozone hole still not shrinking

The Athenian citizen, of course, was always obliged, when necessary and capable, to fight for the fatherland, but the civil aspect of life and culture was predominant: armed combat was only a sport. The logic is that individuals may not spend enough on education because they fail to internalize the positive effect that their education has on other people. For example, in Norway, the percentage of individuals with tertiary education reporting to trust others increases by 20 percentage points compared to someone who has upper secondary or post-secondary non-tertiary education.

How smart classrooms are expanding the horizons of learning?

All the schools taught essentially the same subjects.

Ozone hole still not shrinking

With the focused awareness on injustices in our society today, many wonder how things could ever change — and who's actually working to change them. This global education expansion in the 20th century resulted in a historical reduction in education inequality across the globe: in the period 1960-2010 education inequality went down every year, for all age groups and in all world regions. Regardless, there is much room for

improvement needed in reading, science and especially mathematics.
