15 Best Practices for Internship Programs

Support and reinforcement As with any learners, there must be sufficient support for change to occur. By being there, you stay aware of what is on the minds of your target group, and you can answer any detailed questions that may come up, such as those related to benefits. Unknowingly pushing a student into something that causes anxiety can easily trigger unwanted behaviors in the classroom.

Strategies for Improving Instruction, Curriculum and Student Achievement

Best practice in this case was not the MCQ versus the literature review but the context within which the change was made — a context which includes the teacher and the students as well as the physical environment. Things like creating a shadow-box about the planets for a science lesson or painting a derby car that was built in an engineering unit. But they can also happen in the math or science room.

Top 10 Strategies for Improving Schools

Perhaps one of the best parts of continuous improvement is that it helps. This is time well spent—the effort you put into these sessions will pay off throughout the program.

Best Practices for Designing Effective Rubrics

Through a constant interplay of these elements a few change ideas will rise to the top and can be scaled across a system. Others need time to contemplate their work. Now, when teachers meet with parents around achievement or discipline they all try to make it positive, share data about the student, and co-construct an action plan with the parent, among other things.
