A Note on the Early History of Infantile Paralysis in the United States *

In 1964, the March of Dimes held its first Volunteer Leadership Conference in La Jolla to inaugurate the Salk Institute and to celebrate the gains of the first years of birth defects prevention. From there it was only a short step to an announcement in 1953 by at the , Pennsylvania, that he had developed an effective killed-virus vaccine. Treatment options are often successful at increasing movement, mobility, control, and independence.

What Causes Infant Paralysis?

It is difficult to draw unquestionable deductions from statistics, yet this is the only way we can approach facts of scientific value. It is readily destroyed by exposure to sunlight.

What Are the Causes, Symptoms and Treatment of Infantile Paralysis

It has yet to be eradicated completely and still is a threat in many parts of the world. Army Neurotropic Virus Commission to study polio in North Africa; Albert Sabin, MD was dispatched to conduct parts of this study.

Poliomyelitis: Infantile Paralysis

The contagious nature of polio would be established in 1905.
