Archaeological Prospection

Geophysical methods have been used with increasing frequency in archaeology since 1946; aerial photography has been used since 1919. It was, however, noted for its horses and high-quality flax and achieved its greatest fame as administrator of the important sanctuary of Olympia and president of the Olympic games.

Archaeogeophysics

.

Horsley Archaeological Prospection

During the first flight in 2006, three settlement sites were discovered Mauritsen et al. Electromagnetic soil-conductivity systems are also being increasingly used because of their very high rate of data acquisition.

Archaeological Prospection: Proceedings of the 10th International Conference

Neolithic ring monuments form the oldest monumental buildings of Europe. A summary of 34 different sites is given in the accompanying Table.

Archaeological Prospection

Geophysical prospection methods are now widely used in archaeology, especially within Europe, with new cutting-edge developments arising regularly e. .
